KEY COMPETENCIES

- Shopify Development (Themes, Apps, APIs)
- AWS Serverless & Server Architectures
- AWS Lambda, S3, DynamoDB, API Gateaway

- Frontend Development HTML, CSS, JS, Vue, React, Next.js
- 3rd Party API Integration (Google Ads, Meta, Shopify)
- E-Commerce Customisation

- AI & Data Analytics
- Autonomous Systems (DMS, HMI)
- Agile & Scrum Methodologies
- Advanced Python Dev

FULL STACK DEVELOPER | SHOPIFY EXPERT | PYTHON & AI SPECIALIST

Mechanical Engineering graduate turned **Full Stack Developer** with deep **expertise in Shopify e-commerce development**, API integration, and AI-powered analytics. Proven ability to build and customize robust e-commerce platforms, from front-end UI/UX to back-end automation. Specialized in creating tailored **Shopify themes and apps**, optimizing performance, and delivering seamless user experiences across devices.

Experienced in **Python-based analytics** pipelines, driver monitoring systems, and AI-integrated solutions, with a strong command of modern JavaScript frameworks (React, Vue, Angular), RESTful APIs, and cloud platforms like **AWS**. Adept in **agile workflows**, cross-functional collaboration, and full-cycle product development—from idea to deployment.

Bringing a hybrid background that merges engineering logic, creative problem-solving, and business acumen to deliver high-impact **digital solutions in e-commerce**, automotive, and SaaS sectors.

PROFESSIONAL EXPERIENCE

Freelance, Shopify Developer   **Nov 2021 - Present**

- Shopify theme development and customization, creating responsive and aesthetic e-commerce websites that meet unique branding and functional requirements.
- Shopify app development, delivering custom solutions to enhance functionality and user experience.
- Developing custom online stores with reusable components for managing bulk orders for wholesale.
- Proficient in Storefront, Admin AJAX, GraphQL, and REST APIs for efficient data analysis.
- Built Python-based data distribution models, enhancing analytics with Google Ads and Meta APIs.

Ford Otosan, Autonomous Driving Systems Engineer   **Sep 2021 - July 2023**

- Researching and developing autonomous driving systems and autonomous vehicle HMI features.
- Improvement of camera-based Driver Monitoring System (DMS) algorithms capable of detecting drowsiness or distraction
- Actively contributed to and coordinated HADRIAN (an EU Horizon 2020 project) deliverables.
- Experience as a team member in Scrum and Agile management methodologies

Mosaique, Full Stack Developer   **Sep 2023 - Present**

- AWS based (Lambda, DynamoDB, API Gateway, Amplify, Cognito and more) AI Marketing tool tech lead and co-founder

BuldunGO, Frontend Developer

- e-commerce web design and development of admin panel

Koç University Bioinformatics Lab, Research Assistant

- Identifying disease types using Python-based artificial intelligence models.

EDUCATION

Bachelor of Mechanical Engineering
Koç University | Istanbul, Turkey

EXTRACURRICULAR ACTIVITIES

Koç University IES Member
Koç University Marketing Club, Member
Koç University Rowing Team, Licensed Rower

SKILLS

Microsoft Office (Word, Excel, PowerPoint)

Operating Systems: Linux (Arch based & Ubuntu based), Mac OS, Windows

Programing Languages:

- **Python:** 5 years
- **HTML, CSS, JS:** 5 years
- **Vue.js:** 3 years
- **Node.js:** 3 years

- **React:** 4 years
- **Next.JS:** 5 years
- **Liquid:** 4 years
- **C++:** 1 year
