PROFILE

Senior Full Stack Engineer with 5+ years building production web applications in TypeScript and Python, currently technical owner of AWS-based media and premium streaming platforms (Next.js, React, NestJS) and previously Tech Lead of a cloud-native AI marketing platform. I focus on the engineering around the model: gathering context, validating and correcting outputs, and keeping people in control of what AI produces. Daily user of AI coding agents (GitHub Copilot, OpenCode, MCP-style tools). A Mechanical Engineering background and safety-critical driver monitoring work at Ford Otosan shaped a requirements-first, test-driven way of working in Agile/Scrum teams.

CORE SKILLS

Languages	TypeScript (4+ yrs), Python (5+ yrs), JavaScript, HTML/CSS, SQL
Frontend	React, Next.js (App Router, SSR/ISR), Vue 3, Remix, Redux, Zustand, accessible responsive UI
Backend & APIs	NestJS, Node.js, Python services, REST, GraphQL, third-party integrations (Shopify, Google Ads, Meta)
AI engineering	LLM integration, inference pipelines, context engineering, generate–validate–correct loops, human-in-the-loop review; GitHub Copilot, OpenCode, MCP-style connectors
Cloud & DevOps	AWS (Lambda, API Gateway, S3, DynamoDB, Cognito, Amplify, CloudFront, EC2), Docker, Kubernetes, Terraform, GitHub Actions CI/CD
Quality & ops	Automated testing, code review, observability, auth and access management, secure API design

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer — Talpa Network, Hilversum *Feb 2026 – Present*

Technical owner of AWS-hosted media websites and premium streaming content platforms.

- Own technical decisions across the stack, from architecture and data model to deployment and production reliability.
- Build Next.js, React and TypeScript applications on NestJS APIs, including content management for premium streaming content.
- Manage AWS infrastructure as code with Terraform and deploy containerized services on Kubernetes.
- Run an AI-assisted workflow with GitHub Copilot, OpenCode and tool connectors for code generation, refactoring, tests and review, keeping every change tested and reviewed.

Tech Lead / Full Stack Developer — Mosaique *Sep 2023 – Sep 2025*

Led development of a cloud-native, AI-powered social media marketing platform on AWS.

- Designed the serverless backend with AWS Lambda (Python, Node.js) for data processing, AI model inference and APIs.
- Built AI processing workflows that turn raw social media data into real-time analytics and reports.
- Designed the DynamoDB data model; secured APIs with API Gateway and Cognito; accelerated delivery with Amplify.
- Built the Vue 3 front end and coordinated frontend, backend and infrastructure work across the team.

Full Stack Developer (Freelance) — E-commerce and headless commerce *Nov 2021 – Oct 2026*

- Built headless commerce and CMS solutions with Next.js and TypeScript, and custom Shopify apps with React and Remix.
- Built Python data pipelines integrating Shopify, Google Ads and Meta APIs for client reporting and analytics.
- Containerized client applications with Docker and deployed them on AWS EC2.

Autonomous Driving Systems Engineer — Ford Otosan *Sep 2021 – Jul 2023*

- Improved camera-based Driver Monitoring System algorithms in Python to detect drowsiness and distraction, evaluating YOLO and MediaPipe.
- Developed autonomous vehicle HMI features and coordinated deliverables for HADRIAN, an EU Horizon 2020 project, in a Scrum team.

Frontend Developer — BuldunGO

- Built an e-commerce web app and admin panel with React and Material UI.

EDUCATION & ACTIVITIES

Bachelor of Mechanical Engineering — Koç University, Istanbul, Turkey

Research Assistant, Koç University Bioinformatics Lab · Member, IES and Marketing Club · Licensed rower, Rowing Team
